

Starched String Sculpture Instructions, cont'd.

- 3** Over waxed paper, wrap soaked string over a small inflated balloon for a round sculpture, or place the soaked yarn flat on the waxed paper and form a shape, bending and folding the string over itself to form patterns within patterns.
- 4** Let it dry overnight.
- 5** If you used a balloon, pop it and gently pull it through a hole in the string "globe." You might want to use the colorful balloon scrap in a collage or weaving!
- 6** Attach pieces of cellophane or tissue paper over certain open sections of the yarn sculpture, if you like. That creates an interesting "stained glass" effect that looks great with light coming through it.
- 7** Tie another piece of string to your sculpture and hang it in the window.
